DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

The claims are drawn to seven species (distinct embodiments) of catalyst material for a fuel cell. They are:

- 1) introducing an insoluble substance in the catalyst material and subsequently removing the insoluble substance from the catalyst material to increase a surface area of the catalyst material compared to the catalyst material prior to introducing and removing the substance (readable on claims 1-6);
- 2) placing dry ice into a catalyst mixture to evaporate the liquid portion without agglomeration and growth of particles to form a catalyst material (readable on claims 7-8);
- 3) adding a gas to a catalyst mixture to cause bubbles to promote formation of a foam-type catalyst material (readable on claims 9-11);
- 4) thermally quenching a catalyst material from a high temperature to low temperature to activating the catalyst material (readable on claims 12-14);
- 5) a catalyst material comprising tungsten carbide (readable on claims 15-17);
- 6) a catalyst material comprising zirconium dioxide (readable on claims 18-20); and
- 7) a catalyst material comprising zeolites incorporated with platinum and ruthenium (readable on claims 21-25).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there are no generic claims.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the

Art Unit: 1745

currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request, under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
